CAREER OBJECTIVE

Results-driven IT graduate with a strong foundation in Python and Machine Learning, seeking an entry-level Software Developer or Data/ML Engineer role. Passionate about building scalable and intelligent applications, with a good understanding of developing end-to-end ML systems. Eager to contribute to impactful projects and grow within a dynamic environment.

EDUCATION

GMR Institute of Technology <i>B.Tech in Information Technology CGPA: 8.57</i>	2021 – 2025
Sri Chaitanya Junior College <i>Intermediate Education Percentage: 95.3%</i>	2019 – 2021
Aruna Vidhyalayam School <i>Secondary Education CGPA: 9.7</i>	2019

TECHNICAL SKILLS AND INTERESTS

Programming: C, Python

Database Management: SQL (Queries)

Web Technologies: HTML, CSS, JavaScript

Concepts: OOPs, DBMS

Hobbies: Playing Cricket, Travelling

INTERNSHIP

Attribute-Based Storage with Secure Encryption of Data using Cloud <i>HMI Pvt Ltd, Visakhapatnam</i>	Aug 2024 – Nov 2024
--	---------------------

- Developed an attribute-based storage system with encryption to ensure secure data access in a cloud environment.
- Implemented role-based access control using attribute-based encryption to enable secure and restricted data sharing.
- Designed a system to prevent unauthorised access and improve data confidentiality.
- Integrated multi-layer encryption mechanisms to reduce data breach risks and enhance security.
- Performed testing and validation to ensure system performance, accuracy, and reliability.

PROJECTS

Advanced Fault Diagnosis in Solar Panels: A Deep Learning Approach

- Built a fault detection and classification system for solar panels using Convolutional Neural Networks (CNNs) and image processing techniques.
- Classified multiple fault types such as dust accumulation, electrical damage, physical cracks, snow coverage, and bird droppings with good accuracy.
- Applied image preprocessing and feature extraction techniques to improve model performance and reliability.
- Developed a web-based interface to upload images and display fault predictions for better usability.

CERTIFICATIONS

- Machine Learning with Python – IBM, edX
- Google Data Analytics – Coursera
- AWS Academy Cloud Foundations – AWS

ACHIEVEMENTS

- GPL Runner – Recognised as a GPL runner in a prestigious event conducted by GMRIT, 2023
- Kabaddi Winners at Mandal Level.
